

Dermal Fillers

The Science:

Do you know that some aesthetic companies use dermal fillers that are constituted mainly of animal 'bovine or avian' collagen (from cow's skin or birds)? This can result in allergic reactions for some clients and post treatment problems?

At Uber our chosen products are non-animal based, 'temporary' dermal fillers which replicate our tissues natural composition and that replenishes our own natural Hyaluronic Acid (HA) which is found naturally between the spaces of our cells, this unfortunately declines as we age, leaving us with less volume and structure to our skins.

There is no patch testing required with our preferred products.

The distinguishing factor of these products is the gel particle size. With a selection of products within these ranges tailored to make them as close to the ideal for its intended application and can be used on area of the face, neck and hands, as well as the products being an ethical choice for Uber regards to animal derived products and our beauty industry.

Finally...we do not price per syringe as we feel this can be misleading and confusing for our clients – the selection of products in the ranges below will depend on the area to be treated, and depending upon our choice for you, will make a difference to the volume of product per syringe, hence our pricing policy.

THE BEST OF HYALURONIC ACID
TEOSYAL
EFFECTIVE • SAFE • LONG-LASTING

Teosyal was launched in the UK in 2005. Teosyal was the winner of the 2008 Injectable Product of the year at the UK Aesthetic Medicine Awards beating out competitor nominees including Evolence, Hydracell, Restylane, Radiesse, Sculptra, and Laresse. We use 2 products grades from the Teosyal product range:

Teosyal Global Action:

Teosyal Global Action is recommended for filling linear facial wrinkles, damaged skin, mild or moderate nasogenian folds, and to redefine lip contour. It is recommended for areas of the face where wrinkles are not to pronounce.

Teosyal Deep Line:

It is injected into the mid to deep-dermal layer and is a dense and voluminous implant used to treat deep nasal furrows, lip augmentation and the facial contours of the cheeks and jaw line. It is injected into the deeper layers of the dermis.

Revanesse *Revitalize. Rejuvenate. Renew.*

New products are constantly coming into the aesthetic market place which supersedes other older products that we regularly see advertised. Because of trials and feedback from our clients we have put together our own list of 'preferred dermal filler products' that we as a company have selected to use.

Within the Revanesse family we use two 'grade' types of product which are below, so let us introduce these to you ...

Revanesse®

Is a biodegradable, non-animal-based, clear cross-linked HA gel which is best used to fill superficial imperfections in the dermis such as fine lines, forehead wrinkles, crow's feet, peri-orbital lines and glabellar lines. Average duration is 6 months.

Revanesse® Ultra

Is a high viscosity, biodegradable, non-animal-based, clear HA gel made using Prolenium's® patented cross-linking process. This process creates a thicker, longer lasting gel that improves the ability to treat deep and more pronounced lines and wrinkles such as nasolabial folds and oral commissures. (Average duration is 9 - 12)

Safety...

The safety of our dermal fillers is our utmost concern. The Hyaluronic Acid used in the Revanesse® family of products is obtained through biosynthesis, making it safe and non-pathogenic for humans. With less endotoxins and protein (low levels of endotoxins limit the risk of inflammation, redness and edema) it exceeds the highest standard of purity from any other Hyaluronic Acid dermal fillers.

They are completely free of all animal products, thus reducing the risk of an immunogenic reaction. The Hyaluronic Acid utilised in the Revanesse® product line is naturally integrated into the tissue keeping the skin looking healthy and natural.

***Dermal Fillers:**

Between Eyebrows - (frown lines) - £180.00

Lip Contouring/Augmentation (outer edge plumping) - £310.00

Lip Lines (bleed lines) - £290.00
