Beauty secret of the rich and famous

Molly Hanson Steel provides expert beauty advice for our readers in this regular column. Molly, CertEd BTEC and BABTAC, is a fully qualified lecturer and national trainer, and has her own beauty clinic, Uber Beauty, at 146 London Road, Stockton Heath.

ENQUIRIES have come in fast about what can be done to over plucked eyebrows, stop lipstick bleeding and how to apply makeup so that it lasts all day.

Imagine not having to apply lipstick, eyeliner or define those brows first thing in the morning!

I'm about to let you in on the best kept beauty secret of the rich and famous... permanent cosmetics, or as we call it in the industry: micro-pigmentation or semi permanent makeup.

This is a new and exciting treatment which enhances facial features: eyes, brows, and lips. It is achieved in clinical conditions by infusing hypoallergenic pigments into the dermal layer of your skin, where they remain all

day, every day, gradually fading over time.

Results are very impressive and can be life changing. As well being anti-ageing and rejuvenating, it can also help those who have lost

their hair through chemotherapy or alopecia.

I must admit that out of all the treatments that we do, this procedure is the most satisfying and rewarding, not only for our clientele, but also for us. Why? Because it transforms lives!

Carol from Appleton states that her eyebrows over the years have simply 'disappeared' and she cannot perfect the look she

desires with pencil.

I would recommend, to Carol, that a 'colour mist' brow effect would be most appealing, soft and natural, enhancing her eyes, and best of all, only she will know that she has had

it done.
